## EBITDA AND ADJUSTED EBITDA

A reconciliation of EBITDA and Adjusted EBITDA to the most directly comparable GAAP measure is detailed below. Adjusted EBITDA is defined as EBITDA (earnings before interest, taxes, depreciation and amortization) adjusted for restructuring and other charges, and stock-based compensation. Both EBITDA and Adjusted EBITDA are considered non-GAAP financial measures. Generally, a non-GAAP financial measure is a numerical measure of a company's performance, financial position, or cash flows that either includes or excludes amounts that are not normally included or excluded in the most directly comparable measure calculated and presented in accordance with GAAP. We believe that EBITDA and Adjusted EBITDA provide helpful information with respect to our operating performance including our ability to fund our future capital expenditures and working capital requirements. Adjusted EBITDA also provides helpful information as it is the primary measure used in certain financial covenants contained in our credit agreements. When analyzing our operating performance, investors should use EBITDA and Adjusted EBITDA in addition to, and not as alternatives for Net income or any other performance measure presented in accordance with GAAP. Our non-GAAP financial measures may not be comparable to other similar titled measures of other companies.
